ITU Mini

Compact Online Weather Station

The Harvest ITU Mini is a compact internet-based monitoring solution providing reliable, real-time weather and soil moisture data.

ITU Mini Features:

- Weather Sensors
(air temperature, relative humidity, wind speed and direction, solar radiation, barometric pressure)
- Soil Moisture and Temperature
(Acclima TDT or Aquaflex - multiple sensors supported)
- Solar powered
- Cellular communication with automatic network selection
(no wi-fi or landline required)
- Quick installation
(pre-assembled and working out of the box, mountable on any fencepost)
- Data accessible on Harvest website
(compatible with smartphones)
- Low monthly operating fee
(covers cost of cellular data SIM plus ongoing support)
