Portable Weather Station

Harvest portable automatic weather stations (AWS) are designed for rapid temporary deployment during emergencies or exercises.

- Harvest telemetry data logger with Iridium satellite modem for communication
- Weatherproof stainless steel enclosure with solar panel and battery
- Ultrasonic wind speed and direction sensor
- Hydrological Services rain gauge
- Combined air temperature/relative humidity/barometric pressure sensor
- Portable 1.8m mast (including all mounting gear, takes 5-10 minutes to erect)
- Rugged portable road case for all components for transport (approximately 700 x 550mm x 550mm)

Easy Deploy: 1 person - 10mins
